ARO S. New for 2021, the ARO S and RIOT S models focus on handling, agility, and confidence. With a three-inch lower seat height the new S-models bring a confidence-inspiring stance and effortless handling to the Timbersled experience. (Photo: Business Wire)

New for 2021, Timbersled has released ultra-premium shock packages with the introduction of the RIOT Velocity and the

ARO3 Velocity. These models were developed in pursuit of the ultimate riding experience, bringing legendary Walker Evans Velocity shock technology and performance to the snow bike market for the first time ever.

With a three-inch reduced seat height, the new RIOT S and ARO S models bring unbeatable agility and confidence to the riding experience. Ready to dominate tracks across the snowbelt, the all-new 120 SX is purpose built for the racetrack. Backed by the design expertise and engineering capability of Polaris, the world leader in powersports, the 2021 Timbersled lineup has something for every rider.

RIOT Velocity & ARO3 Velocity

Representing the latest evolution in snow bike technology, Walker Evans Racing Velocity shocks exceed the demands of the most extreme riders. The all-new Walker Evans Velocity shocks are an ultra-premium, high

performance snow bike design. Through the position sensitive needle and tuned remote reservoir design, they offer superior feel and bottom out resistance. High and low speed compression adjustment allow the shock to be fine-tuned for any terrain. The ARO3 and RIOT Velocity models feature exclusive lightweight componentry, developed on the race track. The lightweight drivetrain works in harmony with the Velocity shocks to create a technologically superior, ultra-high performance Timbersled.

ARO S & RIOT S

New for 2021, the ARO S and RIOT S models focus on handling, agility, and confidence. With a three-inch lower seat height than the ARO and RIOT, the new S-models bring a confidence-inspiring stance and effortless handling to the Timbersled experience. The high efficiency suspension design puts more power to the snow, ideal for a 250cc dirt bike. Whether new to snow bikes or an experienced rider, the new S-models are fun and easy to ride.

120 SX

Built upon the success of the factory race team-exclusive 120R, the new 120 SX from Timbersled is designed for the track. A narrow, lightweight chassis equipped with FOX Racing internal bypass shocks provides a cutting-edge foundation for dirt bike riders to race all year long. The 120 SX's lightweight drivetrain components provide power to the ground through an all-new race spec track. A SnowCheck Exclusive model for 2021, the new 120 SX will take racers one place – the podium.

Timbersled snow bike kits stand strong atop the industry, with the easiest conversion, best community, and most complete model lineup. Available at over 200 dealers across North America, the complete 2021 Timbersled lineup has an offering for every riding style.

Full 2021 Timbersled Lineup

Timbersled® RIOT™ 120, LE, & Velocity: A RIOT in all snow conditions, the highest fun factor of any bike on the snow.

Timbersled® 120 SX: Born to Race and Built to Win. Championship caliber technology and race-spec design.

Timbersled® ARO™ S, RIOT S, & RIOT S LE: Unbeatable agility and confidence, with a 3" lower seat height.

Timbersled® ARO™ 129 & 129 LE: Unmatched handling, proven performance.

Timbersled® ARO™ 3 & Velocity: Deep powder dominance with the industry's first and only 3" track.

Timbersled® ARO™ 137 LE: Delivers the ultimate deep snow flotation. Its long, high-flotation track lets riders ride in the deepest snow and make the steepest climbs.

Timbersled® Ripper™: Everyone can enjoy the fun of riding with this kit designed for installation on your favorite 110cc bike.
